STATEMENT

Passionate Frontend Developer skilled in building responsive, user-friendly, and modern web applications. Proficient in HTML, CSS, JavaScript, React.js, and Tailwind CSS, with experience in API integration and dynamic UI development. Focused on creating clean, functional, and high-performance web solutions while continuously learning and improving technical skills.

EXPERIENCE

Junior Frontend Developer

CITA TECH | 2025 – Present

- Developed responsive and user-friendly web applications using HTML, CSS, JavaScript, and React.js.
- Built reusable UI components to improve code maintainability and development efficiency.
- Integrated APIs to fetch and display dynamic data in web applications.
- Collaborated on designing modern, clean, and mobile-friendly interfaces.
- Debugged and optimized websites for performance, responsiveness, and cross-browser compatibility.
- Applied clean coding practices and contributed to production-ready frontend solutions.

Projects

Movie Verse– <https://movie-verse-one-pi.vercel.app/>

- **MovieVerse** is a movie streaming-inspired web application for discovering films and TV shows.
- Displays trending, top-rated, and popular content in a modern Netflix-style interface.
- Allows users to search and browse movies with smooth horizontal scrolling.
- Features responsive design, dynamic rendering, and interactive UI animations.
- Built using React.js, Tailwind CSS, JavaScript, and API integration.

Landing Page - <https://landing-page-lvart-phi-27.vercel.app/>

- **Landing Page** is a responsive web interface designed to showcase personal branding and digital services. It features a modern and visually appealing user interface with smooth animations. The project includes sections for services, projects, social proof, and contact. It was built with a focus on user experience, responsiveness, and clean design. Developed using React, Tailwind CSS, and Framer Motion for interactive effects.

–

Weather App– <https://weather-app-ten-alpha.vercel.app/>

- **Weather App** is a real-time weather forecasting application that provides live weather updates.
- Displays temperature, humidity, wind speed, and weather conditions for different locations.
- Allows users to search cities and view accurate weather data instantly.
- Features a clean responsive UI with dynamic weather updates.
- Built using React.js, JavaScript, CSS/Tailwind CSS, and API integration.

SKILLS

- **Frontend Development:** HTML5, CSS3, JavaScript (ES6+), Responsive Web Design
- **Frameworks & Libraries:** React.js, Tailwind CSS, Bootstrap
- **API Integration:** REST APIs, Fetch API, Async/Await, JSON Handling
- **UI/UX Development:** Mobile-First Design, Cross-Browser Compatibility, Component-Based Design
- **Version Control & Deployment:** Git, GitHub, Vercel, Netlify
- **Tools & Problem Solving:** VS Code, Chrome DevTools, Debugging, Clean Code Practices
